TRIPTYCH PENTHOUSE APARTMENT

Triptych is a premier boutique apartment address located in the heart of Melbourne's Arts and Entertainment precinct. Comprising of both affordable and high end luxury living options

THE BUILDING

Located in the heart of the Melbourne Arts and Cultural precinct, awarded Australian Best Residential Development at the 2012 Propoerty Council of Australia/Rider Levett Bucknall Innovation & Excellence Awards. Sustainabil-ity, style and soul define the building, while the apartment is distinguished by unsurpassed luxury, natural light and spectac-ular outlooks.

THE REQUIREMENT

The north facing Penthouse required superior heat and glare control, without compromising the panoramic views. Also required a seamless solution for shading large spans of windows.

THE SOLUTION

Verosol's solution delivers quality, performance and contemporary style, consistently reflecting the high-end, sustainable design of the building. Motorisation is an ideal solution for shading large spans of glass or inaccessible windows. Easily integrated into home automation and building management systems, it allows for the effortless operation of a large number of blinds via remote control. SilverScreen delivers ultimate glare control and unrivalled solar reflectance and insulation. The metal backing dramatically improves solar energy control, whilst the semi-transparent nature demonstrates excellent view through to maintain the spectacular outlooks of the apartment.
